Research Experience

Dissertation Research on Risk Factors for Intimate Partner Femicide – a retrospective case-control study reviewing intimate partner homicide cases since 1980 in Burlington County, NJ, and

comparing them to aggravated assault cases from the same time period on empirically supported risk factors for homicide.

Research Intern with Policy Research Associates on cross-training curriculum development project concerning co-occurring substance abuse and mental illness. Primary Investigator: Policy Research Associates, Inc.

Interviewer for Classification of Violence Risk (COVR) software validation project This project was an outgrowth of the ten-year study completed by Monahan et al. on Violence Risk Assessment. Primary responsibility involved interviewing psychiatric inpatients at Hahnemann Hospital concerning violence. Primary Investigator: Policy Research Associates, Inc.

Conducted research on hostile attributional biases and social information processing for a sample of adult and juvenile offenders. The adults were recruited from the Monmouth County Correctional Center and the juveniles were recruited from the Monmouth County Juvenile Detention Center. Results of this research were presented at the annual research colloquium held at Monmouth University.
